<p>9/19 LS Creation Quote</p> <p>There is a growing sensitivity to the environment and the need to protect nature, along with a growing concern, both genuine and distressing, for what is happening to our planet... Our goal is not to amass information or to satisfy curiosity, but rather to become painfully aware, to dare to turn what is happening to the world into our own personal suffering and thus to discover what each of us can do about it. Each year sees the disappearance of thousands of plant and animal species which we will never know, which our children will never see, because they have been lost forever. The great majority become extinct for reasons related to human activity. Because of us, thousands of species will no longer give glory to God by their very existence, nor convey their message to us. We have no such right. Teach us to how to overcome and heal our estrangements from Earth and one another, to live in right relationship with all our surroundings and to accompany those we encounter who suffer most from Earth’s climatic change. Amen.</p> <p>Action: Develop a plan for accompanying those whose lives and relationships have been disrupted by ecological deterioration. This might include prayer and advocacy, as well as personal interaction.</p> <p>https://tinyurl.com/2p8usb6s</p>
